

Ladies and gentlemen,

Thank you for allowing me the opportunity to speak today. I rise to express my objections to the proposed environmental impact plan. While I appreciate the efforts put forth by the proposal's creators, I am concerned about the potential negative consequences that this plan poses to our community and natural habitats.

Firstly, the proposal does not adequately address the long-term effects of increased industrial activity on our local ecosystems. Our community prides itself on its vibrant wildlife and pristine natural landscapes, and this plan threatens to disrupt these vital areas.

Secondly, the proposal lacks sufficient measures to mitigate pollution levels. With an increase in industrial operations, it is likely that pollution will rise, affecting air and water quality, which is a direct threat to public health and the well-being of future generations.

Lastly, the community has not been given enough voice in these decisions. As stakeholders, we deserve a decision-making process that genuinely considers our concerns and priorities.

I urge you to reconsider and revise the plan to better reflect these critical aspects. Our environment is not just a resource but a legacy, one we must protect and preserve for the future.

Thank you for your consideration.
