

Ladies and gentlemen of the jury, I respectfully raise an objection to the line of questioning posed by opposing counsel.

The question is leading and suggests an answer that benefits their narrative rather than eliciting a truthful response from the witness. This undermines the integrity of the testimony and obscures the facts that we are all here to clarify.

I urge you to recognize the importance of maintaining a fair and impartial examination of evidence. We cannot allow the truth to be clouded by coercive tactics. I trust in your commitment to justice and ask for your agreement in sustaining this objection for the sake of a fair trial. Thank you.
