

Good morning, team.

Today, we're here to discuss the strategy for Operation Stormfront. Our primary objective is to secure the high ground along Ridge Alpha, which will provide us with a strategic advantage over opposing forces.

We'll initiate at 0600 hours with Alpha Unit advancing from the west side to create a diversion. Charlie Unit will then flank from the east, taking advantage of natural cover provided by the woodland. Delta Unit will provide overwatch support to identify and relay enemy movements.

Logistics have pre-positioned supplies at the southern checkpoint, ensuring resupply is efficient and quick. Communication is paramount; maintain radio silence until contact is established, then switch to scrambled channels.

Remember, adaptability is key--observe, orient, decide, and act swiftly. Any deviations or unexpected encounters must be communicated immediately. We're prepared, and by executing this plan with precision, we will achieve our objectives.

Stay focused, stay safe, and let's execute this mission successfully.

Dismissed.
