

Ladies and gentlemen,

Welcome to today's safety training session. Our main priority here is to ensure that each and every one of you understands and adheres to our safety protocols. It is critical that you pay close attention, as these guidelines are not just recommendations--they are mandatory.

First, always be aware of your surroundings. If you see something unsafe, report it immediately to your supervisor. Remember, it is everyone's responsibility to maintain a safe working environment.

Second, ensure you are wearing the appropriate personal protective equipment at all times in designated areas. This is non-negotiable. Your safety is our top priority, and so is adhering to these requirements.

Next, we expect you to follow all emergency procedures as practiced. In the event of an incident, stay calm, follow instructions, and proceed to the designated assembly points.

Finally, never take shortcuts when it comes to safety procedures. They are set in place to protect you, your colleagues, and our operation as a whole.

Thank you for your commitment to upholding our safety standards. Let's work together to maintain a secure and productive environment.
