

Good evening, esteemed colleagues and guests,  
I am truly humbled and grateful to stand before you today to accept this incredible accolade for scientific innovation. This journey began many years ago with a simple spark of curiosity. As a child, I was always fascinated by how things worked. I would take apart gadgets at home, much to my parents' dismay, and try to understand their inner workings. This curiosity led me to pursue studies in science, where I was fortunate enough to encounter inspiring mentors and peers who encouraged my passion for discovery. Through countless hours in the lab and enduring numerous failed experiments, I learned that every setback was a stepping stone toward innovation.

I must acknowledge the incredible team that has been with me through this journey. Their dedication and hard work have been a constant source of motivation. Together, we have explored uncharted territories and turned challenges into opportunities.

This accolade is not just mine but belongs to everyone who believed in the power of innovation and the potential of scientific pursuit. It is a testament to what can be achieved when curiosity drives us forward, and we dare to push the boundaries of what is possible.

Thank you, once again, for this extraordinary honor. Here's to many more discoveries that await us on this incredible journey.

Thank you.
