

Hello everyone,

Thank you for giving me the opportunity to present our innovative solution today. I'm excited to introduce you to EcoCharge, a revolutionary portable solar power bank that is designed to keep your devices charged wherever you are.

**\*\*Problem:\*\*** We all face the challenge of keeping our devices charged while on the go, especially during outdoor activities or travel. Traditional power banks eventually need a power outlet, and that's not always convenient.

**\*\*Solution:\*\*** EcoCharge is equipped with high-efficiency solar panels that allow users to harness the sun's energy. It stores power efficiently and supports fast charging for all types of devices. With its sleek, durable design, it's perfect for adventurers and everyday users alike.

**\*\*Market Opportunity:\*\*** The portable power bank market is growing rapidly, with a projected worth of \$25 billion by 2025. EcoCharge stands out with its sustainable and self-sufficient charging capability, tapping into the increasing consumer demand for eco-friendly products.

**\*\*Competition:\*\*** While there are many power banks on the market, few prioritize sustainability and practical performance under real-world conditions. Our unique solar technology and robust design set us apart.

**\*\*Business Model:\*\*** We will target outdoor retailers, tech enthusiasts, and eco-conscious consumers. Our pricing strategy is positioned to be competitive yet reflects the value and enhanced features of EcoCharge.

**\*\*Ask:\*\*** We are seeking an investment of \$500,000 to accelerate our production and expand our marketing efforts. Your support will help us reach global markets and make clean, portable energy accessible for all. Thank you for considering this opportunity to drive a positive impact with EcoCharge. I'm happy to answer any questions you may have.

Thank you.
