

Ladies and gentlemen, fellow students,

Today, we gather here with a shared purpose and a unified voice to demand accountability from those who hold the power to shape our educational environment. We are here because we believe in the fundamental right to a quality education and transparent decision-making that respects our needs and concerns.

We stand before you to call on our school administration and policymakers to listen to our voices and take concrete action. We demand clarity and accountability in the allocation of resources that affect our learning. We seek to ensure that every decision made reflects the best interests of students--not just in words, but in actions.

Our demands are simple and fair. We ask for an open dialogue with those in power, where our questions are met with clear answers and our concerns are addressed with meaningful plans. We seek transparency in budgeting, policies, and every facet of decision-making that impacts our school life.

Let us not be ignored or dismissed. We are not just students; we are the future. And the future deserves accountability.

Thank you.
