

Ladies and gentlemen,

Thank you for gathering here today to stand up for a cause that affects us all--our healthcare system. We are not just patients; we are mothers, fathers, children, and loved ones seeking a system that truly cares for us.

Imagine a world where you walk into a clinic and feel heard, where the focus is on preventing illness, not just treating it. That's the future we're fighting for--a system that prioritizes wellness and dignity.

Every one of us deserves timely access to quality care, without worrying about bills piling up. We need transparency, affordability, and compassion.

Let's raise our voices for reform that puts patients first. Together, we can create a healthier future for everyone. Thank you for your courage and commitment. Let's keep pushing forward!

Thank you!
