

Ladies and gentlemen,

Today, I want to address an issue that many of us have become acutely aware of: the challenges of online education. While the intention behind digital learning is commendable, we cannot ignore its growing issues.

First, there is the glaring problem of accessibility. Not every student has reliable internet or the necessary devices, creating a divide between those who can participate fully and those who cannot. This digital divide is more pronounced in underprivileged communities, making a fair education system difficult to achieve.

Second, the lack of direct interaction impacts learning. Teachers and students struggle to connect through a screen, losing out on the vital interpersonal engagement that enhances the learning experience.

Motivation wanes as the personal touch disappears.

Lastly, the inconsistency of quality content is troubling. Not all online courses are created equal, leading to a disparity in the educational value received by students who rely on these platforms.

In conclusion, while online education is here to stay, we must address these significant issues to ensure it benefits all and upholds the integrity of learning. Thank you.
