

Ladies and gentlemen,

Thank you for gathering today to address an issue that impacts our safety, efficiency, and overall well-being: maintenance neglect. Our infrastructure poses significant challenges and reminds us of the responsibility we hold as custodians of these crucial assets.

Neglecting maintenance leads to unforeseen breakdowns and costly repairs, pushing us further from our goals. We must shift from a reactive approach to a proactive one, integrating routine checks and scheduled upkeep into our systems. This shift will not only minimize disruptions but also extend the lifespan of our assets and improve safety standards.

I urge everyone to commit to developing a structured maintenance plan, allocating resources wisely, and prioritizing training for our teams. By doing so, we safeguard our operations and set a standard of excellence in our field.

Let us collaborate and act decisively to transform maintenance from an overlooked necessity into a cornerstone of our success.

Thank you.
