

Certainly! Here's a simple example:

---

**\*\*Instructor:\*\*** "Alright class, today we are going to discuss the water cycle. Can someone explain what the water cycle is in simple terms?"

**\*\*Student:\*\*** "Sure! The water cycle is the process where water moves from the ground to the sky and back again. Basically, water evaporates from places like lakes and oceans, forms clouds, then falls back as rain or snow, and the cycle repeats."

**\*\*Instructor:\*\*** "Exactly! That's a clear and concise explanation. The water cycle is essential for maintaining ecosystems and providing fresh water for plants, animals, and humans. Does anyone have any questions about this process?"

---

This example demonstrates clarity and engagement in seeking precise clarification in a classroom discussion.
