

Ladies and gentlemen,

Today, I'd like to take a moment to clarify our academic grading system. Understanding how we evaluate and communicate student performance is essential for everyone involved.

Our grading system is structured around the following scale:

- **\*\*A (90-100%)\*\***: This grade represents excellent performance. Students who achieve an "A" have shown a strong understanding of the material and have gone above and beyond in their assignments and exams.
- **\*\*B (80-89%)\*\***: A "B" indicates good performance. Students have a solid understanding of the content, although there may be some minor areas for improvement.
- **\*\*C (70-79%)\*\***: This grade reflects average performance. It shows that the student has met the basic requirements but should consider reviewing certain areas to gain a fuller understanding.
- **\*\*D (60-69%)\*\***: A "D" is a sign that there are significant gaps in understanding. To improve, students are encouraged to seek additional help and resources.
- **\*\*F (below 60%)\*\***: This grade indicates a failure to meet the minimum course requirements. It's crucial for students who receive an "F" to consult with their teachers to develop a plan for improvement.

Additionally, we use plus and minus designations to provide a more precise evaluation of student performance within each grade category.

It's essential for students and parents to regularly check online portals or report cards for updates on academic progress. We also encourage open communication with teachers for further clarification or assistance.

Thank you for your attention, and let's work together to ensure the success of all our students.
