

Ladies and gentlemen,

Today, I want to talk to you about something that affects us all--our environment. Every day, we depend on the natural world for the air we breathe, the water we drink, and the resources we use. But our environment is in danger, and it's up to us to make a change.

Imagine if each of us committed to making small adjustments in our daily lives. We could start by reducing our plastic use, turning off lights when they're not needed, and choosing public transportation over driving. These actions might seem small, but together, they make a big difference. Moreover, educating ourselves and others about environmental issues can amplify these efforts. By understanding the impact of our choices, we inspire those around us to be more environmentally conscious.

Let's work together to protect our planet. By taking action today, we ensure a healthier, more sustainable future for generations to come. Thank you.
